

HIGH PERFORMANCE ALUMINIUM BI-FOLD DOORS

Alulux Group Ltd is a UK based family run business. All our systems are designed, engineered and built in-house, and we pride ourselves in providing high quality products at affordable prices to trade customers with discounts available on multiple purchases (5 or more sets)

Introducing our range of high performance aluminium bi-fold doors, designed to transform the way you enjoy your home and to seamlessly connect your living space with the outside.

Bi-fold doors are always in high demand, we offer a number of standard sizes at reduced costs and fast delivery. We also make bespoke sizes to order with an unparalleled degree of flexibility. Doors can achieve a height of 2.7m (106 inches) and each panel up to a width of 1m (39 inches).

Almost any number of panels can be hinged together for large openings and the doors can stack left, right or both sides and to the inside or outside for optimum use of space. It is also possible to have doors meet on a 90 degree corner with stunning effect when fully open.

Our bi-fold doors are top hung with the highest quality steel rollers which include Italian stainless steel ball-bearings. The doors glide along the track seamlessly, enabling them to open and close with ease. All other subcomponents of our ironmongery are made from stainless steel or aluminium.

Creating a seamless link between the inside and outside is achieved by a fold down weather bar system, meaning our tracks are completely flush to the floor. It also offers a weather tight seal from the external environment. The bottom track is designed to sit 32mm below inside finish floor level meaning there is no trip hazard and makes our bifold doors completely wheelchair friendly.

Our bi-fold doors have a polyamide thermal break which ensures that the external environment stays external. Thermal efficiency is a priority in all of our products.

Our bi-fold doors are designed so that they are easy to install - all of our products come fully glazed with handles and locks. Fitting instructions are included.

We supply three standard sizes, prices as follows:

Model	Size	Price per unit (incl VAT)
T2	2.4m x 2.1m	£1490 plus delivery
T1	3m x 2.1m	£1590 plus delivery
T3	4m x 2.1m	£1890 plus delivery
